

RFID Standard: UHF EPC Gen2

*Custom designed and tested for both seasonal and daily tickets

Unique QR codes: Each ticket has a unique QR code that links to a web app for personal timing and tracking.

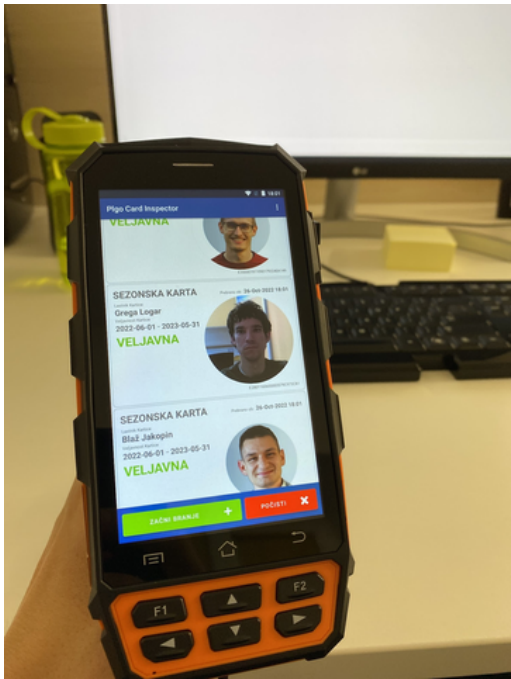

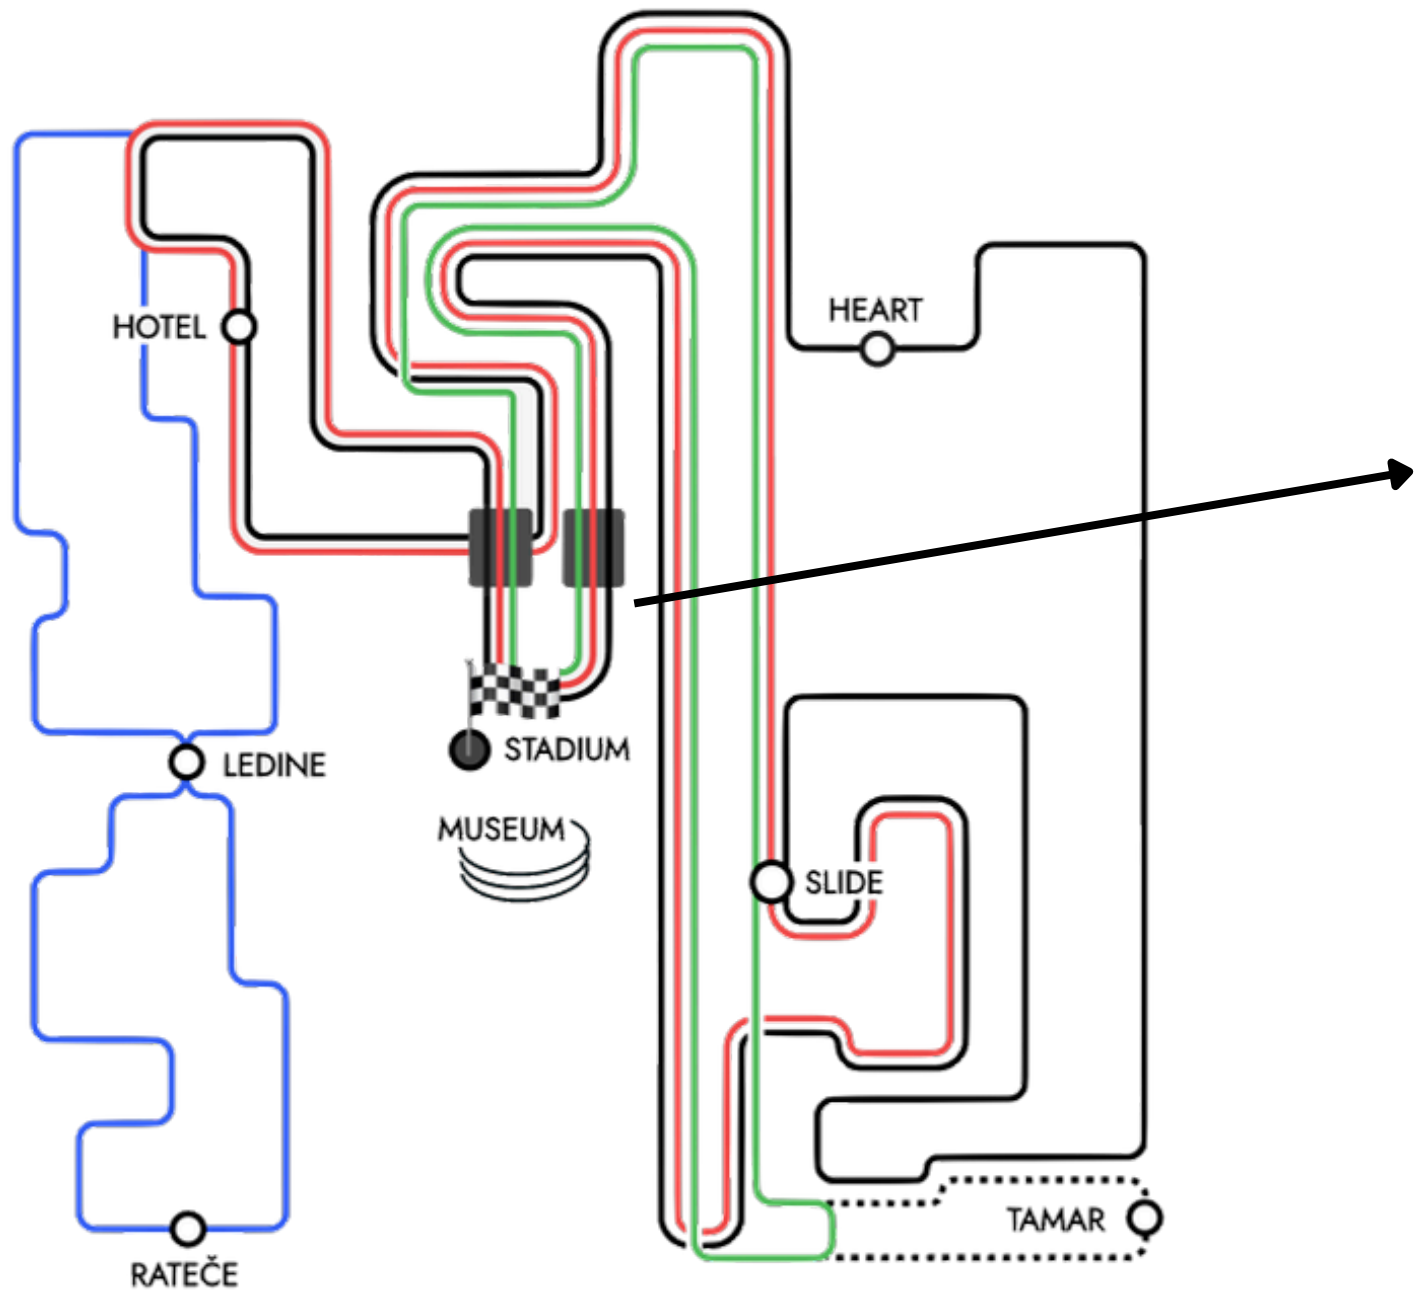

Seasonal Tickets
(plastic card)

Daily Ticket
(paper sticker)

Covering a network of 25km: Placing measurement stations at strategic locations to enable proper algorithmic **counting** of laps, and also optimised for access **control and inspections**

Inspector Mobile device: Inspectors use a mobile device with an integrated long-range antenna for access control and card validation. In most cases, the ticket validity can be checked without stopping the visitor.
